

Water Filter SS 202 Grade Model No: (HHWF 101)

Water Filter Stainless Steel 202 Grade Manufactured by Hospital Holloware India

Specs :-

Water Filter is used for pure drinking water

Water Filter gives you the solution for better health and hygiene. It gives you clean, pure & safe drinking water, it helps protecting your family from water-borne disease.

The S.S. Container consists of upper and lower chambers made of Non-Magnetic stainless steel. The Ceramic Candle filter's Activated Carbon Granular & Silver Particles kills all the germs and spores & allowing pure, Crystal clear water.

Water Filter is made of Stainless Steel 202 Grade which has good corrosion resistance to many environments has good formability and can be readily welded.

Advantages of Stainless Steel Water Filter:

Pour water straight from the top in to the upper chamber.

The laboratory tested candle filters all germs, bacteria and impurities out of the water.

The Stainless steel containers resist chemical reaction and non corrosive and scratch proof, light and unbreakable.

Safe pure water collects in the lower chamber which is ready to drink crystal pure & safe water.

Easily Movable, Light Weight & works without electricity.

We are Manufacturer, Exporters and Suppliers of Water Filter Stainless Steel 202 Grade at competitive prices from India.
